

whole home control

AMX Home Whole Home Control adds convenience and simplicity to your home and your lifestyle with simple, easy-to-use touch-panel control that transforms your home into a symphony of orchestrated sounds, sights, and feelings. Control the way you hear, see, and feel your home with one simple interface that allows you to adjust your audio, lighting, and climate control levels. Control screens with large buttons

and icons are easy to navigate and quickly allow you to make adjustments or change settings to make your home more comfortable, gracious, and energy-efficient. Each screen gives you complete control and feedback that confirms every button press and provides you with information, confidence, and peace of mind.

Select the music you want to hear in each room and control volume from one central location or in each room with local room audio controls

Turn lights on when you come home at night, turn lights off from your bedside, or set lighting presets for nighttime pathways or the perfect lighting for entertaining

Adjust your temperature, or set a time program for temperature settings to automatically change throughout the day, or set vacation temperature levels

Set the temperature or adjust the heaters, pumps, or jets for relaxing in the spa or for a refreshing swim in the pool

View IP-based security cameras to keep an eye on the front gate or pool, or check your local weather or traffic before you leave the house
