

"THE NEW STANDARD OF CERTIFICATION IN THE CONTROL INDUSTRY"

ACE CONTROL SYSTEM DESIGN EXPERT

WHAT IS ACE?

At AMX, we understand that people and companies who take the time to receive training and reach the standard of certification deserve special credit and recognition. As a result, AMX is proud to offer the AMX Certified Expert, or ACE Program. The program is designed to give special credit and recognition to the individuals and companies who have gone above and beyond to become certified.

WHAT IS AN ACE LEARN TRACK?

A "learn track" is a strategic bundle of activities that leads to a specific ACE certification and presents activities in a specific sequence.

WHAT ARE THE DESIGN EXPERT REQUIREMENTS?

The Design Learn Track consists of the following requirements:

- **Getting Started with AMX** (Online)
- **Intro to Networking for AV Professionals** (Online)
- **Control Designer** (Classroom)

Once you have passed all the certification requirements, then you become an ACE Control System Design Expert.

WHAT ARE THE REQUIREMENTS FOR CERTIFICATION?

A student must attend the required AMX classes in the Learn Track and pass the appropriate certification test and practical exam. When a student becomes certified in all AMX Control Expert Learn Tracks, they earn the status of ACE Control System Design Expert.

MUST A STUDENT COME TO DALLAS TO ATTEND CLASSES?

No. The online courses are available on our website (www.amx.com) and the classroom courses are taught in all AMX training locations around the world. See www.amx.com/training for a current list of global training locations.

WHAT ARE THE BENEFITS TO BEING ACE CERTIFIED?

- Greater visibility in the AV marketplace as a Certified Expert
- The latest on new AMX products and applications
- The opportunity to be a beta tester
- Use of the ACE Control System Design Expert logo on business cards, letterhead, or as needed to show your customers that you hold the highest certification in the control industry

WHAT ARE THE REQUIREMENTS FOR RENEWING MY CERTIFICATION?

- Effective January 1, 2008, ACE Certifications are maintained each year by earning Continuing Education Units (CEUs) plus any certification-specific gap training as specified at the beginning of each year. Every AMX University course and selected Industry courses offer CEUs to maintain your ACE Certifications. Please visit www.amx.com/training/ace.asp for current CEU information.
- Any changes to your email address, employment or other contact info should be updated in your AMX.com profile to ensure that your certification and course history is properly maintained. Please contact service@amx.com or TrainingHelp@amx.com with any questions about updating your profile.

WHAT ARE THE BENEFITS TO A COMPANY WITH CERTIFIED INDIVIDUALS?

- Companies who have their employees certified with AMX will generally make more money and save time, because their employees are able to do their jobs more efficiently.
- Many large projects include an ACE Certification requirement in the bid specification. Companies with ACE Certified employees are eligible.
- ACE Certified employees can learn from other ACE members around the world by participating in the ACE Forum at www.amxforums.com.
