Notes:
 Schedule subject to change without notice.
 Please check <http://www.amx.com/training> for current course schedule and availability.

Following are high-level descriptions of all current AMX University classroom course offerings. **Courses are subject to change, and not all courses are available in all locations.** Refer to **Online Registration and Schedules** at www.amx.com/training for complete details regarding upcoming courses and locations and prerequisite information.

- **AMX Essentials**

This one-day introductory course offers you an exciting look at the capabilities of AMX products and control systems.

- **AMX Designer**

This one-day ACE certification course for Designers gives you the tools and knowledge necessary to effectively design control systems using AMX VisualArchitect, a feature-rich tool you will use to design a basic control system and automatically generate the files your control system needs.

- **AMX Installer**

This 3-day ACE certification course for Installers focuses on the fundamentals of installing an AMX control system through hands-on experience with AMX VisualArchitect, NetLinx™ Studio, and numerous diagnostic utilities.

- **AMX Residential Bootcamp**

This 5-day ACE Certification course is designed for residential dealers of all levels who want to understand basic AMX control systems from beginning to end.

- **AMX Programmer I**

This 5-day course for programmers and technical support personnel teaches the basic techniques for programming an AMX control system using NetLinx Studio.

- **AMX Programmer II**

This 5-day course for programmers and technical support personnel focuses on intermediate techniques for programming an AMX control system using NetLinx Studio.

- **AMX Programmer III**

This 3-day course for programmers teaches advanced NetLinx programming techniques using NetLinx Studio.

- **RMS Installation and Setup**

This 3-day course teaches you how to implement the Resource Management Suite with a server and NetLinx control system.

- **Building Java Modules Using Cafe Duet™**

This 3-day course for programmers uses the AMX Café Duet software to develop communication modules for third-party devices.

- **TPD4 UI Design**

This 2-day course is for anyone who designs graphical user interfaces for AMX Control Systems.
