- RS232
- Ethernet

AMX Jetpack is an incredibly affordable switching, transport, and control solution for classrooms and small-to-medium meeting spaces that provides simple to operate room controls, multiple video inputs, and enables voice lift for clear communication with everyone in the space. The JPK-1300 combines 4K60 4:2:0 HDMI and USB-C video switching and distance transport, room control, wallplate accessibility, and audio amplification in a kit that requires zero programming and provides the security and reliability that AMX is well known to provide.

The kit is fully loaded to support a wide range of classroom and meeting space applications and can be controlled through panel buttons, RS-232, Telnet, SSH, a Web GUI, and the Jetpack Manager application.

Cost-Effective Kit

A cost-effective solution that combines HDMI and USB-C video switching, distance transport, control, and audio amplification for voice lift – all in a convenient kit.

USB-C & HDMI 4K Support

Video resolution is up to 4K60 4:2:0 HDCP2.2. Extends 4K signal up to 40m and 1080p signal up to 70m on a single category cable

USB Pass-through

USB pass-through for smart board connection. Touch screen / HID control back the source PC connected to TX USB-C and USB-B Ports

Simple Installation

- Web GUI configuration
- Supports CEC, IR, RS232 and Relay control
- Supports IR learning, and pass through
- Single Category cable between devices
- One power supply powers the whole kit

Easy Management

- System management software on PC to discover and manage all the kits on the same network
- Open API for third-party control
- Stand-alone Web GUI configuration and control

Completing The Solution

Built-in 2x25W amplifier and microphone mixing. Combine with JBL ceiling speakers and AKG wireless microphones for a total solution.
