This order would result in receiving a keypad built like this:

BUTTON POSITIONS

Button position numbers start at the top or top-left. They first go across (where applicable), and then down to the next row. The bottom button on both MET-7E and MET-13E keypads is a two-position button that can either be used for a single button (standard or custom), or specially-designed +/- button which has two distinct pushes, one on the left side and one on the right side. See the *Metreau Keypad Instruction Manual* for more details on this button layout.

STANDARD BUTTONS

Standard buttons are some of the more commonly used buttons in keypad layouts. Their part numbers should be utilized as follows:

MA5794-XXYY-AB

Part number prefix;
This is fixed and is used
for all Metreau Keypad buttons

02: single-width button (MET-6NE all; MET-13E buttons #1-12)
03: double-width button (MET-7E all; MET-13E button #13)

CUSTOM BUTTONS

Custom buttons can be ordered for text that is not available in the standard button options. In general, a maximum of six (6) characters will fit on the face of a single button and ten (10) will fit on the face of a double button. The part number is similar as with standard buttons, with one addition needed in the description portion of the order form, shown below:

MA5794-XXYY-CUSTOM

Part number prefix;
This is fixed and is used
for all Metreau Keypad buttons

02: single-width button (MET-6NE all; MET-13E buttons #1-12)
03: double-width button (MET-7E all; MET-13E button #13)
