

THE AMX ROOM SOLUTIONS AT A GLANCE: A QUICK GUIDE TO FINDING THE RIGHT TECHNOLOGY FOR ANY ROOM

To hold the Perfect Meeting requires the perfect meeting space. In our information-centric business world, it is crucial that a company’s conference room technology encourages collaboration among meeting participants both local and remote. To create the ideal collaborative environment, AMX has defined a range of **Standard Room Solutions** that correspond to the most common meeting spaces in corporate campuses today. These room configurations are described as follows:

Room Solution	Activity Description	Example
<p>Basic Huddle Space</p>	<p>Where small groups hold ad-hoc meetings and jointly review content from a mobile device on a single display.</p>	
<p>Managed Huddle Space</p>	<p>Where small groups hold ad-hoc or scheduled meetings and review content from multiple mobile devices and a room PC. Room includes lighting sensors and supports web conferencing.</p>	
<p>Conference Room</p>	<p>Where groups of 2-10 meet and review content from multiple sources (including live and stored content from cable/satellite and Apple TV) on a single room projector. Room includes lighting sensors and supports video conferencing or web conferencing.</p>	
<p>Boardroom</p>	<p>Where companies hold important management, board and client meetings and wish to showcase an elegant look and feel. Room supports distribution of a broad array of content on multiple displays. Room includes lighting sensors and supports video conferencing or web conferencing.</p>	

Each Standard Room Solution is designed to accommodate or encourage certain user behaviors and activities, as described below:

	Basic Huddle Space	Managed Huddle Space	Conference Room	Boardroom
Typical Square Feet	100	100	300	400
Connect and share information from a mobile device, digital and analog	✓	✓	✓	✓
