

GOVERNMENT

Bringing AV FOR AN IT WORLD
to top government facilities

AMX LLC, a wholly-owned subsidiary of Harman International, is the leading manufacturer of advanced audio visual management solutions. Founded in 1982, AMX's mission is to provide best-in-class solutions for simplifying the implementation, maintenance and use of technology. Our award-winning products span control and automation, system-wide switching and audio/video signal distribution, networked AV, digital signage and technology management.

AMX by HARMAN is dedicated to providing world-class engineering, top notch design, and delivering reliable, secure solutions to government and military agencies and installations. Our solutions have been tested to military standards, achieved security certifications and are relied upon daily in many of the world's most demanding facilities. AMX by HARMAN products can be found in the control centers of presidents, prime ministers, defense departments and intelligence centers around the globe. They are also found throughout state, county and city government agencies.

Effective environments are of supreme importance in mission-critical operations. Our products are ideal for Emergency Operation Centers, Court Rooms, Crime Fusion Centers, Command Centers and NOC's. On the education side, our products can be found in Auditoriums, Stadiums, Large Classroom Environments and Research Facilities. AMX by HARMAN has AV management technology solutions for all your government and education AV integration needs.

AMX by HARMAN SOLUTIONS

Modero X Series Control Panels:

The industry's most advanced control panel. A single point of control and automation for all your technology. AMX control panels integrate all the functionality you need in a meeting into a single, streamlined interface that looks great in any room environment.

AMX Enova DVX All-in-One Presentation Switchers:

Supports all your conference room AV, switching and distance transport needs. Tested and JITC (DoD's Joint Interoperability Certifier) approved by the US Department of Defense, proving that this solution is secure and reliable.

AMX Enova DGX Digital Media Switchers:

Centralized AV management for large, multi-room facilities, enterprise campuses and network operation centers.

RMS by AMX:

A scalable client/server based software that provides remote management and scheduling capabilities for building systems.

RPM by AMX:

A cloud-based software configuration tool that allows you to easily configure your AV system. No programming required.

AMX SVSI Networked AV:

Distributing AV over your network is a breeze with the SVSI Networked AV solutions. It uses standard network cabling and IP technology to distribute source content to your endpoint components.
