

1

Download the *Zoom Rooms for Conference Rooms and Touchscreen Displays* application from *zoom.us* and install it on a macOS or Windows computer.

You must have an active Zoom Rooms account.

<https://zoom.us/download>

2

Download the *Zoom Rooms Controller* app from *AMX.com* and install it on your AMX Modero G5 touch panel.

The readme file within the ZIP file contains specific steps to install this app on your panel via USB drive.

https://www.amx.com/en-US/product_families/amx-zoom-collaboration-solutions

3

Pair the two applications.

Enter the 6-character PIN displayed by the Room PC into the *Zoom Rooms Controller* app running on the touch panel. You may also need to log into your Zoom account on the panel using the link provided.

<https://zoom.us/pair>

You can now control your *Zoom Rooms* meetings from the AMX touch panel. Your AMX touch panel has the unique ability to display the *Zoom Rooms Controller* app side-by-side with other AMX control buttons.
